

STEPS PERFORMED IN AVIX CLIENT TO EXPORT THE FILE FOR TRANSLATION

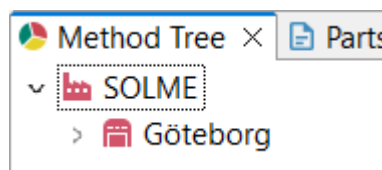

1. Step: open Window Preferences

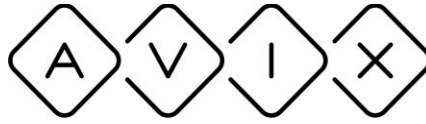

1. Step: select the languages you want

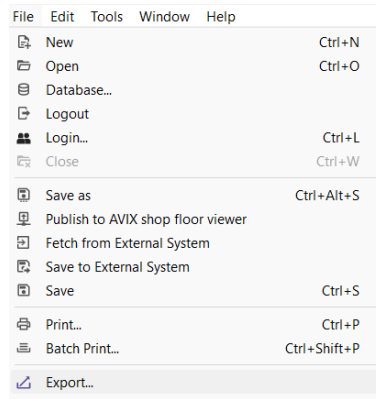

2. Step: in the created structure, click on the "plant" icon (example SOLME) and press ALT SPACE

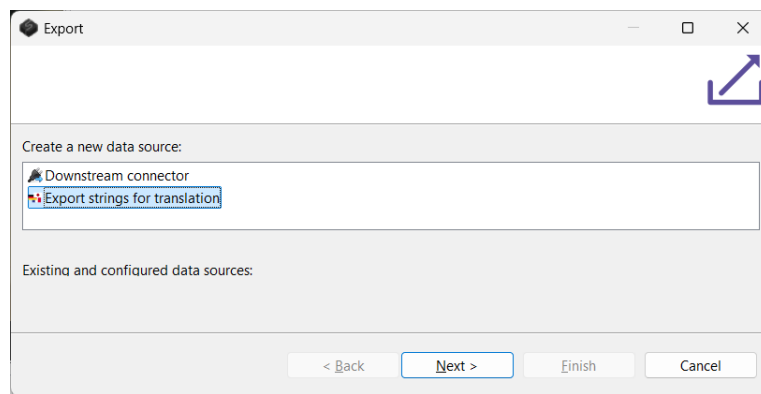

SOLME AB – translations

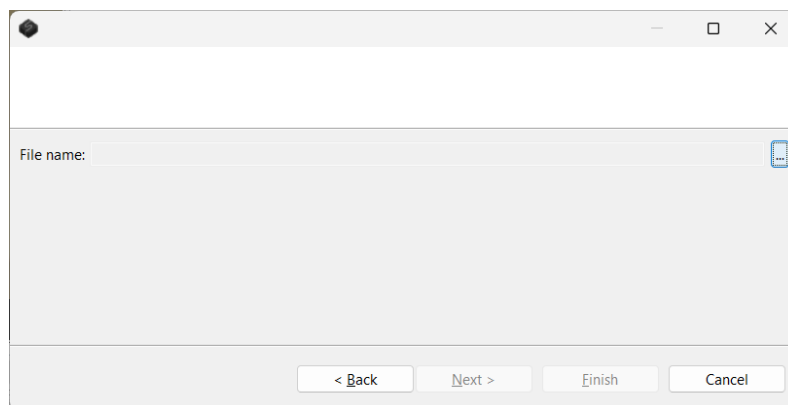

3. Step: Open File Export:

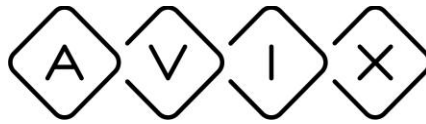

4. Step: In the Export dialog, click Export strings for translations:

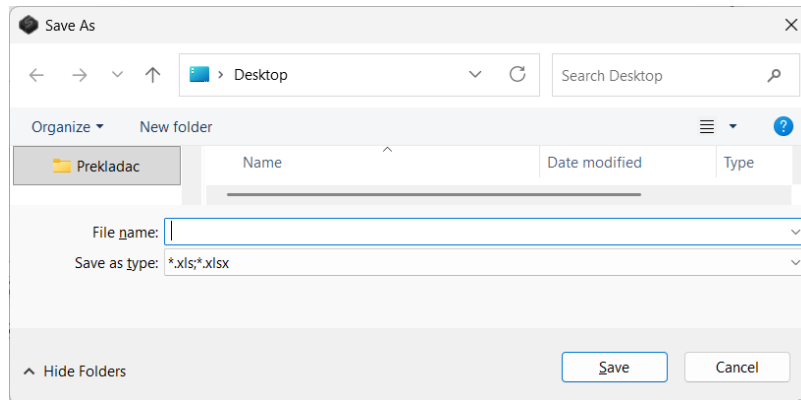

5. Step: click to open the save site to export the file

6. Step: enter a file name:

STEPS FOR TRANSLATION IN THE AVIX TRANSLATIONS WEB APPLICATION

1. Step: Open the <https://avix-translator.streamlit.app/app>

AVIX AI Translation

www.avix.eu

SK

Nahraj XLSX alebo XLS súbor

Drag and drop file here
Limit 200MB per file • XLSX, XLS

Browse files

2. Step: insert the exported xls file in AVIX and choose from which language the translation should be made (if there is only one language filled in in the xls, the system will automatically load it itself and automatically load the required languages for translation)
